CORPORATE MEMBERSHIP BROCHURE

IBOGP®

EMPOWERING ORGANIZATIONS THROUGH GLOBAL STANDARDS, CERTIFICATION, AND STRATEGIC COLLABORATION

The **Corporate / Institutional Membership** program of the **International Board of Oil and Gas Professionals (IBOGP®)** provides organizations with a formal pathway to align their **workforce development, certification, and operational practices** with globally recognized professional standards.

By joining as a corporate or institutional member, your organization becomes part of a global network committed to advancing **competence, safety, innovation, and sustainability** in oil, gas, and energy systems.

This partnership strengthens your corporate brand, enhances employee skillsets, and positions your organization as a leader in professional excellence and compliance with international benchmarks.

WHO SHOULD JOIN

The **Corporate / Institutional Membership** is designed for organizations seeking structured collaboration with IBOGP® in training, certification, research, and talent development.

It is ideal for entities such as:

- **Oil and Gas Companies** – exploration, drilling, refining, logistics, and distribution organizations.
- **Energy and Engineering Service Firms** – EPC contractors, consulting companies, and technology providers.
- **Universities and Technical Institutes** – academic institutions offering petroleum, engineering, or energy-related programs.
- **Training Providers and Certification Centers** – professional training firms seeking accreditation and standardization support.
- **Government Agencies and Policy Institutions** – departments or councils involved in energy policy, safety regulation, or capacity building.

Whether your organization operates in upstream, midstream, or downstream segments—or within renewable energy or digital transformation domains—IBOGP® offers an opportunity to integrate global excellence frameworks directly into your human capital strategy.

ELIGIBILITY

To qualify for **Corporate or Institutional Membership**, an organization must hold a **verified business or institutional registration** in its country of operation.

Applicants should demonstrate a commitment to workforce competency, continuous improvement, and quality management aligned with **ISO 29001 (Sector-specific Quality Management for Petroleum and Natural Gas Industries)** and **ISO 21001 (Educational Organization Management Systems)** standards.

Membership is open to both public and private entities worldwide, subject to review and approval by the **IBOGP® Partnership and Membership Committee**.

MEMBERSHIP BENEFITS

Corporate / Institutional Members of IBOGP® enjoy a suite of strategic and operational benefits that enhance capacity, credibility, and global engagement.

1. Workforce Training and Certification Packages

Member organizations gain access to **tailored certification and training packages** for employees across all levels—from junior staff to executives.

Programs are delivered virtually, on-site, or through authorized training partners, with significant member discounts and customization options.

2. Global Brand Recognition

Corporate members are featured as **IBOGP® Partner Organizations** on the official website and digital platforms.

This global recognition affirms the organization's commitment to international quality standards and professional excellence.

Members receive the official **IBOGP® Corporate Member Seal** and are authorized to display the partnership badge across marketing and training materials.

3. Custom On-site Workshops and Chartered Certification Routes

IBOGP® designs bespoke learning interventions and executive workshops tailored to organizational goals. Member organizations can host on-site chartered certification routes for their employees, allowing workforce certification under ISO-aligned frameworks with measurable impact. Training themes include project leadership, HSE management, AI integration in energy, ESG governance, and operational excellence.

4. Joint Curriculum and Program Development

Corporate and institutional members are invited to co-develop training curricula and academic frameworks in collaboration with IBOGP® experts.

This includes integration of IBOGP® certifications into academic programs, ensuring that students and employees graduate with globally portable, ISO-aligned credentials.

Curriculum partnerships also support ISO 29001 and ISO 29993 compliance across corporate training functions.

5. Research and Policy Collaboration

Institutional members may partner with IBOGP® on **joint research initiatives, industry surveys, and policy recommendations** focused on digital transformation, safety, and sustainability.

Members also receive **invites to leadership roundtables**, global conferences, and policy dialogues shaping the future of energy systems.

6. Talent Pipeline and Recruitment Support

IBOGP® connects members to a global network of certified professionals for hiring, internships, and project collaboration.

Corporate partners may also sponsor student competitions, case studies, and innovation labs as part of IBOGP®'s workforce readiness initiatives.

7. Ongoing Professional Engagement

Members receive priority access to all IBOGP® events, certification renewals, and corporate engagement programs, along with 50% discounts on conferences and workshops.

Each member organization is assigned a Corporate Success Manager to coordinate benefits, reporting, and partnership activities throughout the year.

ANNUAL FEE

Corporate and Institutional Membership fees are **tiered based on organization size and scope of operations**, starting at **\$4,500 per year**.

Each membership package includes onboarding assistance, digital certification, workforce discounts, and co-branding privileges.

Customized pricing applies to large multinational or government institutions that operate across multiple countries or business divisions.

MEMBERSHIP TIERS AND PRICING

Flexible Options for Organizations of Every Size

- **Standard Corporate Membership:**

Ideal for small to mid-sized firms focused on workforce upskilling and certification support.
